

The Dynamic Ventilator Reserve is a public-private effort to aid in distributing ventilators to critical areas in the fight against COVID-19. Here's how it works:

STEP 1

Identify project lead and attend kick-off call.

STEP 2

Identify ventilator availability and need.

STEP 3

Provide ventilator specs.

STEP 4

Ventilator requesting and supplying hospitals contact the AHA.

STEP 5

AHA reviews requests; if approved, DVR is activated.

STEP 6

AHA and Cohealo verify inventory in DVR.

STEP 7

Availability is confirmed and request fulfilled.

STEP 8

Transporter is arranged for pick-up and delivery.

STEP 9

Ventilators delivered.

STEP 10

After use, transporter picks up and returns ventilator.
